DAPA ATELIER

INTERIOR DESIGN - FIRE RETARDANCY POLICY

Version 1.0 - dated 05/04/24

The below schedule has been created in line with our interpretation of the regulations for FR treatment for interior designers - spanning across various spaces
This is a guide only - it is the responsibility of the client to check the below meets the conditions of their building regulations, referring specifically to the use of a space
If you class your space as “High Hazard” or “Very High Hazard” a specific fire policy must be provided by you (client)

There are several type of fire retardancy/treatment that are relevant to the interiors that we deliver: **Non-FR** - no treatment is required for this item **BS 5852: Part 1** - Cigarette & Match - suitable for upholstery in domestic and low hazard environments **BS 5852: Part 2** - Ignition Source 5 (Crib 5) - suitable for upholstery in commercial and medium hazard environments **BS 5867: Part B** - suitable for curtains and drapes in the hotels, public buildings and offices **Class B** - suitable for wallpaper in commercial spaces **Class C** - suitable for wallpaper in residential spaces	Non-FR	BS 5852: Part 1	BS 5852: Part 2	BS 5867: Part B	Class B	Class C	Notes
